FY 2003 - 3rd Quarter EXCEPTION REPORT

FY 2003 - 3rd Quarter EXCEPTION REPORT

GOAL #1: Clean & Safe Water Program #4210: Safe Drinking Water			
<i>Objective #1</i> : By 2005, population served by community water systems providing drinking water that meets 1994 health-based standards will increase to 95%.			
TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.1.3	TASK: New and Existing System Capacity Development. Assure that new community water systems and non-transient non-community water systems which commenced operations since October 1, 1999, can demonstrate technical, managerial and financial capacity to operate in compliance with the requirements contained in the federal regulations in effect at the time the water system begins operations. Refine and implement an Existing System Capacity Development Strategy to ensure that existing systems have the technical, managerial and financial capacity to operate in compliance with the requirements contained in the federal regulations. Implement the WIFA/DEQ Partnership to provide Operational Technical Assistance. DELIVERABLES:		
SRF/ Cap Dev V	1. Assist all newly proposed water systems in gaining adequate capacity prior to issuance of AOC.	T = Ongoing	Drinking Water
SRF/ PWSS II	2. Update capacity development master priority list annually for existing systems.	T = 7/01/02	Drinking Water
SRF/ Cap Dev V	3. Conduct capacity development workshops targeting water systems from the master priority list.	T = 12	Drinking Water
SRF/ PWSS II	4. Identify TMF obstacles/challenges faced by existing systems.	T = Ongoing	Drinking Water
Cap Dev V	5. Implement strategies to address #4 issues.	T = Ongoing	Drinking Water
Cap Dev V	6. Distribute capacity assistance workbooks to water systems appearing on the master priority list.	T = 200	Drinking Water
SRF/ PWSS II	7. Annual Report to EPA in conjunction with WIFA.	T = 9/30/02	Drinking Water
SRF/ PWSS II	8. Submit capacity development report required by 1420(b)(2) to EPA.	T = 8/06/02	Drinking Water

3RD QTR:			
Deliverables #2 and #3 are off target. Current staffing levels for rule development functions have been reduced resulting in delays in adoption schedule. Radionuclides and arsenic rule development process began 9/02 with second stakeholder meeting held 4/4/03 and rule submission to Secretary of State occurring in May. Extension request for arsenic to be submitted to EPA.			

NOTES: i) Some dates are outside of FY03
 ii) Partial freeze of state-funded FTEs is in effect.

FY 2003 - 3rd Quarter EXCEPTION REPORT

GOAL #1: Clean & Safe Water		Program #4210: Safe Drinking Wa ter	
Objective #3: By 2005, standards that establish protected levels for additional 10 high-risk drinking water contaminants.			
TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.3.1	TASK: Drinking Water Rule Development (Cont'd.) DELIVERABLES:		

FTE FUNDING SOURCE	MONTHS	AMOUNT

FY 2003 - 3rd Quarter EXCEPTION REPORT

GOAL #1: Clean & Safe Water		Program #4840: NPS/Pesticides	
<i>Objective #8</i> : By 2005, complete a baseline assessment and data management systems, complete characterization (using 305(b) criteria), defined scope/schedule for TMDL's, complete inventory of NPS activities - for 30% of watersheds. (Tie the 30% to Unified Watershed Assessments).			
TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.8.2	TASK: Pesticide Monitoring (Cont'd). DELIVERABLES:		

EXCEPTION REPORT COMMENTS

(Info Needed: On-Target, Off-Target, Completed or N/A(No Activity). If "Off Target", please explain why.

1ST QTR:
 Deliverable #1a; sampled 7 wells in Yuma (plus 2 QA/QC samples) using ADA's FIFRA money. No additional sampling planned for FY03 -- as no money available other than ADA's. Deliverable #1b no activity. Deliverable 3: complete; no additional funds available for further monitoring. Deliverable 4: no further activity. Deliverable 5: completed.

2ND QTR:
 Deliverable #2; ongoing. Deliverable #3; completed in July 2002. Additional money coming from ADA in March 2003.

3RD QTR:
 No activity on deliverable 1b. Deliverable #2 is ongoing.

FTE FUNDING SOURCE	MONTHS	AMOUNT
ST PPG	5.00	12,319
WQARF 319(h) Imp. IV	4.50	12,685
ST 319(h) NPS Impl. III	1.00	3,824
ST 319(h) NPS Impl. IV	3.00	11,472
Total	13.50	40,300

FY 2003 - 3rd Quarter EXCEPTION REPORT

GOAL #1: Clean & Safe Water		Program #4610: WQ Assessment - GW/SW	
<i>Objective #8:</i> By 2005, complete a baseline assessment and data management systems, complete characterization (using 305(b) criteria), defined scope/schedule for TMDL's, complete inventory of NPS activities - for 30% of watersheds. (Tie the 30% to Unified Watershed Assessments)..			
TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.8.3	TASK: Water Quality Database Development, Implementation & Management Develop and manage the Water Quality Division Database (WQDB) oracle applications to support data storage, access, retrievals, analysis, integration, and sharing. DELIVERABLES:		
	1. Provide GPS training.	T = 5 classes/yr	Data Mgmt.
	2. Validation of GPS data.	T = 750 data points/yr	Data Mgmt.
PPG	3. Input/retrieve - Groundwater quality data into the GWQDB.	T = 25,000 records/yr	Hydrology
PPG	4. Assist in the preparation of the Annual Groundwater Quality Report to the legislature.	T = 9/02 A = 9/15/02	Hydrology (lead) Data Mgmt.
*104(b)(3) AZ Priorities/ PPG	5. Implement and maintain periodic data transfers from WQDB to STORET (includes both surface water and groundwater quality data).	T = 6/03	Data Mgmt. (lead) Hydrology
	6. Participate in agency-wide data integration and e-government efforts.	T = As needed	Data Mgmt.
	7. Continue analyses, design, programming and implementation steps to link LTF with Water Permits & Certifications including Engineering Review and AZPDES modules.	T = 6/03	Data Mgmt.
	8. Database applications training and user documentation.	T = As needed	Data Mgmt. (Lead) All Sections
	9. GIS projects in coordination with water programs, GIS Strategic Plan, and GIS Technical Committee. Projects include watershed and water quality assessments, WQARF sites, SWAP, E-MAP, wellhead protection, and special technical studies and modeling/simulations.	T = As needed	Data Mgmt.
PPG	10. Conduct maintenance for the WCET system.	T = As needed	Compliance

FY 2003 - 3rd Quarter EXCEPTION REPORT

GOAL #1: Clean & Safe Water		Program #4610: WQ Assessment - GW/SW	
<i>Objective #8:</i> By 2005, complete a baseline assessment and data management systems, complete characterization (using 305(b) criteria), defined scope/schedule for TMDL's, complete inventory of NPS activities - for 30% of watersheds. (Tie the 30% to Unified Watershed Assessments).

1.8.3	TASK: Water Quality Database Development, Implementation & Management (Cont'd.)		
	DELIVERABLES:		
PPG	11. Improve SDWIS interface linking ADEQ enforcement actions to violations.	T = 9/15/02 A = 9/15/02	Data Mgmt. (Lead) Drinking Water
PPG	12. Drinking Water database development		Data Mgmt. (Lead) Drinking Water
	a. IESWTR/DBPR module	a. T = 9/02	
	b. Lead and Copper module	b. T = 7/02 A = 8/02	
EXCEPTION REPORT COMMENTS			
(Info Needed: On-Target, Off-Target, Completed or N/A(No Activity)). If "Off Target", please explain why.			
1ST QTR:			
Deliverable #3: 6,500 records this quarter. Deliverable #4: completed. Deliverable #5: on target.			
Deliverable #4, #11 and #12b (Phase I) are completed. Deliverable #12a is off target; the IESWTR/DBPR has been only 40% completed due to resource constraints and frozen vacant positions. Established goal to fully complete incorporation of the rule into the database by 12/02. All other deliverables are on target.			
2ND QTR:			
HSAS: Deliverable #3; information requests: 29; test results entered: 5,376 this quarter. Deliverable #5: on target.			
Data Management: Deliverable #12a continues off target; however, substantial progress made assuring completion by 02/03.			
Drinking Water: State is planning on moving to SDWIS State. Analysis has begun to evaluate and determine work necessary to make this switch.			
3RD QTR:			
HSAS: Deliverable #3: information requests 38, test results entered 6,922 this quarter. Deliverable #5 is on target.			
Data Management: Deliverable #12a has been suspended due to SDWIS-State transit plans. All other deliverables are on target.			
Drinking Water: State is planning on moving to SDWIS-State. Analysis has begun to evaluate and determine work necessary to make this switch.			
Compliance: Deliverable 10 proceeding satisfactorily. Responsibilities were transferred to Data Mgmt. Group.			

* Partial funding by AZ Priorities grant, pending EPA approval.

Note: Partial freeze of state-funded FTEs is in effect.

Hassayampa River - Buckeye Canal to Gila River xi. Salt River - 23rd WWTP to Gila River xii. Painted Rock Reservoir - on Gila River xiii. Painted Rock Borrow Pit Lake <ul style="list-style-type: none"> a. Attend meetings. b. Collect historic information. c. Establish work plan. 		Hydrology
	8. Include interstate TMDL analysis coordination.	T = Ongoing T = Ongoing T = 4/03 T = As needed	Hydrology
PPG	9. Commence Targeted Team Activities.		Hydrology SRO
	a. Develop boiler plate SAPs to be used for quickly planned sampling trips.	T = 7/02 A = 12/02	
	b. Develop site specific SAPs as needed.	T = As needed	
	c. Establish a priority ranking system to evaluate waters on the planning list.	T = 7/02 A = 8/02	
	d. Assist TMDL project staff with monsoon sampling as needed and as time permits.	T = As needed	
	e. Commence targeted monitoring.	T = 7/02 A = 11/02	

FY 2003 - 3rd Quarter EXCEPTION REPORT

[illegible]

* This segment may require intense monitoring using equipment that will be available 9/03.

Note: Partial freeze of state-funded FTEs is in effect.

FY 2003 - 3rd Quarter EXCEPTION REPORT

Goal # 1: Clean & Safe Water		Program #4610: WQ Assessment GW/SW	
Objective #8 : By 2005, complete a baseline assessment and data management systems, complete characterization (using 305(b) criteria), defined scope/schedule for TMDL's, complete inventory of NPS activities - for 30% of watersheds. (Tie the 30% to Unified Watershed Assessments).			
TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.8.10	TASK: TMDL Analyses (Cont'd) DELIVERABLES:		
EXCEPTION REPORT COMMENTS			
(Info Needed: On-Target, Off-Target, Completed or N/A(No Activity). If "Off Target", please explain why.			
1ST QTR:			
Deliverable 1:			
1 a(1),b(1),c(1) & a(4),b(4),c(4) – workplan being revised due to final prioritization of 303(d) list – these streams do no meet the “high priority” criteria. Queen Creek reach is already listed for targeted team in 9g.			
1a(2),a(3): on target			
1b(2),b(3): on target – both SAPs in draft but must be revised to address IWR			
1c(2),c(3): on target			
1d-1g: off target – no monsoon rain events in watershed so no new data collected. Looking for alternative projects with sufficient data.			
Deliverables 2-4, 6-8: on target			
Deliverable 5:			
5(1), 5(2), 5(9): on target			
5(3) off target due to lengthy response to comments; to AAR for publication 10/20; final submittal to EPA in 12/02			
5(4) completed 9/02			
5(5) on target to AAR 9/02			
5(6) delist completed for phosphorus 9/02; on target for nitrogen and bacteria			
5(7) on target - collected some monsoon data but unclear whether it will be sufficient for modeling purposes			
5(8) off target – need substantial gw information; USGS study on hold due to ADWR reduction in funding. ADEQ is considering assisting in project but information would not be available for 2-3 years; assimilation study cannot be completed w/o gw information.			
5(10) completed 9/02			
Deliverable 9:			
9a on target; SAPs in draft, need to be updated to address new IWR requirements			
9b, 9d on target			
9c completed 8/02			
9e off target, due to staffing issues and adoption of IWR that has delayed startup. Anticipate progress in 2 nd qtr			
9f off target, concentrating on pre-TMDL and targeted monitoring for this FY03			
9g off target, workplan to be revised per new prioritization of final 303(d) and Planning Lists.			

Goal # 1: Clean & Safe Water	Program #4610: WQ Assessment GW/SW
---	---

FY 2003 - 3rd Quarter EXCEPTION REPORT

Objective #8 : By 2005, complete a baseline assessment and data management systems, complete characterization (using 305(b) criteria), defined scope/schedule for TMDL's, complete inventory of NPS activities - for 30% of watersheds. (Tie the 30% to Unified Watershed Assessments).

TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.8.10	TASK: TMDL Analyses (Cont'd) DELIVERABLES:		

EXCEPTION REPORT COMMENTS

(Info Needed: On-Target, Off-Target, Completed or N/A(No Activity). If "Off Target", please explain why.

2ND QTR:

Deliverable 1:

1 a(1),b(1),c(1) & a(4),b(4),c(4) – The workplan is being revised due to final prioritization of 303(d) list. These streams do not meet the "high priority" criteria. The Queen Creek reach is already listed for targeted team in 9g.

1a(2),a(3): on target

1b(2),b(3): on target – Both SAPs are in draft but must be revised to address the IWR.

1c(2),c(3): on target

1d-1g: off target – The TMDL report cannot proceed until additional samples have been collected. There has been no measurable surface flow at this site this FY. We are considering starting an alternative project with sufficient data.

Deliverables 2-4, 6-8: on target

Deliverable 5:

5(1): on target for turbidity; delisted for dissolved oxygen for 10/02.

5(2), 5(9): off target due to lack of flows. Project being extended through 2003 in anticipation of El Nino runoff flows this spring/summer.

5(3) off target - Lengthy response to comments; before the AAR publication which was completed 12/08; EPA is encouraging changing the report to reflect final approval of WQS (approved by EPA after TMDL sent to AAR). This will delay final submittal to the EPA and may require additional modeling before finalizing report.

5(4) completed 9/02 – removed from 303(d) list in 2002.

5(5) off target - AAR publication was completed 12/08. Responding to EPA comments on final draft. Anticipate final submission in Jan. 2003. This is a pre-emptive TMDL where technological fix is the key.

5(6) delist completed for phosphorus 9/02; need additional nitrogen and bacteria data to complete reports.

5(7) off target - This report cannot proceed until additional samples have been collected. There has been only 1 measurable flow event this FY.

5(8) off target – This report needs substantial gw information. ADEQ has partnered with USGS on its Upper and Middle Verde Study but information will not be available for 2-3 years. The assimilation study/modeling cannot be completed w/o gw information.

5(10) completed 9/02 – removed from 303(d) list in 2002.

Deliverable 9:

9a completed 12/02.

9b, 9d on target

9c completed 8/02.

9e Commenced monitoring 11/02.

9f off target, concentrating on pre-TMDL and targeted monitoring for this FY03 and working with watershed unit to determine "how" to measure effectiveness.

9g off target, workplan to be revised per new prioritization of final 303(d) and Planning Lists.

FY 2003 - 3rd Quarter EXCEPTION REPORT

Goal # 1: Clean & Safe Water

Program #4610: WQ Assessment GW/SW

Objective #8 : By 2005, complete a baseline assessment and data management systems, complete characterization (using 305(b) criteria), defined scope/schedule for TMDL's, complete inventory of NPS activities - for 30% of watersheds. (Tie the 30% to Unified Watershed Assessments).

TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.8.10	TASK: TMDL Analyses (Cont'd) DELIVERABLES:		

EXCEPTION REPORT COMMENTS

(Info Needed: On-Target, Off-Target, Completed or N/A(No Activity). If "Off Target", please explain why. 3RD QTR:

Deliverable #1a(1), b(1), c(1) and a(4), b(4), c(4) - Off target; revisions to the workplan as a result of finalization of the 303(d) List, resulted in striking these segments from the FY 2003 workplan. Items a(1), b(1), and c(1) have been moved to FY2004 workplan.

a(2), a(3) On Target

b(2), b(3) On Target - Drafts are available.

c(2), c(3) On Target

d(1), e(1), f(1), g(1) Off Target - Because of a lack of flow, these were stricken from the revised workplan. Samples were collected in February and March flow events, however, more must be collected before d(1) - g(1) can occur.

Revised a(4), a(5), b(4), b(5), c(4), c(5) and d(1), d(2) On Target

Deliverable #2: On Target

Deliverable #3: On Target - ADEQ/FS Annual Meeting was held in February; BLM meeting scheduled for April 2, 2003.

Deliverable #4: On Target - great training opportunities during recent winter storms!

Deliverable #5:

1. On Target for turbidity, delisted DO in 10/02

2. and 9. Off Target due to lack of flow. This project has been extended through June 2004 to capture anticipated spring and summer El Nino flows.

3. Off Target - EPA encouraged report revisions because of changes in surface water quality standards which were adopted after the TMDL was sent to the AAR. Additional modeling was necessary and contracted. New modeling results have been received and the report is being updated. The public process will need to be re-started.

4. On Target - delisted (N) in 10/02

5. Off Target - AAR publication was completed 12/08/02. Response to EPA comments on final draft and final submission is forthcoming.

6. On Target for (P) which was delisted 10/02; Off Target for N and E.coli - Because of the mechanics driving loading, summer sampling will be necessary for these parameters.

7&11. Off Target due to a lack of flow in the first half of FY02. February and March present good winter flow events which were sampled, however more samples must be collected before D-G can occur. The project manager has been and continues to be on military leave; this project has been temporarily re-assigned.

8. Off Target due to the need for a better understanding of groundwater contributions (necessary for modeling), an ADEQ/USGS partnership has been established to further study groundwater loading to the stream. Data will be made available to ADEQ in 2 to 3 years.

12. Public comment period closed. All 3 reports being prepared for AAR publication in April '03.

Deliverable #6; off target due to lack of rain. No winter storms of sufficient size have hit Bisbee yet. Will continue to monitor into FY04 for background contributions.

Deliverable 9a. and 9c. complete - The draft for 9a. is available.

b.,d. On Target

f. Off Target due to a concentration on planning list monitoring and providing assistance with TMDL activities moved to FY04.

g. On Target

Deliverables #8 and #10. On Target

FY 2003 - 3rd Quarter EXCEPTION REPORT

FY 2003 - 3rd Quarter EXCEPTION REPORT

Watershed-based Plans (updated Dec. 16, 2002)

TASK 1.8.11 ATTACHMENT

1. Introduction

The introduction should include the purpose of the plan (water quality standards, a community effort, etc.), a summary of the TMDL, a problem statement, and goals.

Mini-Characterization

Characterization of the *appropriate-scale* watershed – assessment of natural resource and environmental conditions, and an identification of problem sources (constraints such as TMDLs, 303(d), Planning List waters) and/or natural amenities (opportunities such as Wilderness or Unique Waters) using existing data that includes:

A definition of the watershed:

(*Define scale of Watershed, 10-Digit, 8-Digit or other*)

A brief description of watershed characteristic including:

- (i) Physical topography, surface hydrology, climate, precipitation, groundwater basin hydrology and sources/springs, geology, soils, vegetation, wildlife biology (T&E species if relevant).

An identification of problems, pollutants of concern and applicable water quality standards and/or identification of Unique Waters, Wilderness Areas etc...

- (i) Human disturbances, land ownership, land uses; agriculture, domesticated animals, grazing allotments, urban hard scape/impermeable surfaces;
- (ii) Existing point sources (PS); and,
- (iii) Existing Nonpoint Sources (NPS); including natural background sources.

3. TMDL

A. Identify Pollution Sources

An identification of the causes and sources or groups of similar sources (using a map or a description of the critical areas and flow duration curves if applicable) that will need to be controlled to achieve the load reductions estimated in this watershed-based plan. Based on the TMDL, identify the existing loadings. Sources that need to be controlled should be identified at the significant subcategory level with estimates of the extent to which they are present in the watershed (e.g., X numbers of dairy cattle feedlots needing upgrading, including a rough estimate of the number of cattle per facility; Y acres of row crops needing improved nutrient management or sediment control; or Z linear miles of eroded streambank needing remediation).

2. Best Management Practices (BMPs)/ Management Measures*

A description of the management measures or BMPs and associated costs that will need to be implemented to achieve the load reductions estimated in this plan and an identification (using a map or a description) of the critical areas where those measures are needed.

c) Estimated Load Reductions *

An estimate of the overall load reductions which the plan expects to achieve. An estimate of the load reductions expected for each of the management measures or BMP (recognizing the natural variability and the difficulty in precisely predicting the performance of management measures over time). Estimates should be provided at the same level as in item (2) above (e.g., the total load reduction expected for dairy cattle feedlots; row crops; or eroded streambanks). Costs per BMP should be

FY 2003 - 3rd Quarter EXCEPTION REPORT

included.

FY 2003 - 3rd Quarter EXCEPTION REPORT

4. Action Plan

A narrative description for implementing the BMPs identified in this plan that is reasonably expeditious.

1. BMPs or Management Measures

2. Schedule of Milestones

A schedule of interim, measurable milestones for determining whether the BMPs or other control actions are being implemented.

(iii) Evaluation of Progress

A description used to evaluate the progress and effectiveness in achieving the watershed plan goals including:

- a. A set of criteria that can be used to determine whether loading reductions are being achieved over time and substantial progress is being made towards attaining water quality standards and, if not, the criteria for determining whether this watershed-based plan needs to be revised or, if a TMDL has been established, whether the TMDL needs to be revised. Adaptive implementation ensures the watershed plan is not halted because of a lack of data and information, but progresses as better data are collected and analyzed to improve upon the initial watershed plan.
2. Monitoring to evaluate the effectiveness of the implementation efforts measured against the criteria established in the watershed plan. This should include pollutants and other environmental indicators to be monitored, sampling locations, and sampling schedule and monitoring needs at the site specific, watershed, and/or state level.

(iv) Coordination and Education/Outreach

An information/education component that will be used to enhance public understanding of the project and encourage their early and continued participation in selecting, designing, and implementing BMPs.

Technical and Financial Assistance

An estimate of the amounts of technical and financial assistance needed, associated costs, and/or the sources and authorities that will be relied upon, to implement this plan. As sources of funding, States should consider the use of their Section 319 programs, State Revolving Funds, USDA's Environmental Quality Incentives Program and Conservation Reserve Program, and other relevant Federal, State, local and private funds that may be available to assist in implementing this plan.

Other concerns i.e. 303(d) List of Impaired Waters not on the TMDL list, or Unique Waters/Wilderness Areas – Special Designations

FY 2003 - 3rd Quarter EXCEPTION REPORT

GOAL #1: Clean & Safe Water		Program #4620: WQ Management Planning	
<i>Objective #9:</i> By 2005, reduce total Pollutant loading (point source and Nonpoint source) by 30% for 30% of watersheds by developing baseline through monitoring, by performing compliance assistance measures in accordance with the watershed plan, and by increasing public involvement and partnerships with stakeholders.			
TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
1.9.1	TASK: Support of On-Site Wastewater System Program & County Delegations. Develop and implement strategies to improve the effectiveness of programs controlling wastewater and our responsiveness to the county delegations administering those programs. Work with Drinking Water and On-Site System Programs to establish policies, procedures and technical criteria related to on-site systems and delegated authority of the counties. Conduct advisory groups and sub-committees to advise ADEQ on specific water quality issues relating to on-site systems and delegated authorities.		
PPG	DELIVERABLES: 1. Update and administer wastewater facilities general permit program. a. Conduct meetings with delegated agencies to implement Unified Water Quality Permits. (Six meetings with 20 environmental health directors.) b. Conduct field consultations with each of 20 delegated agencies with water delegations. c. Negotiate and develop delegation agreement amendments. d. Convene and conduct technical advisory committee for On-Site Wastewater Facility Program. e. Prepare implementation documents for the on-site program rules. f. Prepare draft technical amendments for on-site rule. g. Develop overall program plan for the statewide on-site system program. h. Implement overall program plan as scheduled. 2. Administer delegated water and wastewater programs. a. Perform delegated program reviews b. Submit report to OAC 90 days following field review completion.	T = 6/30/03

1.9.2	TASK: Certification of NPDES Permits (Cont'd). DELIVERABLES:		

EXCEPTION REPORT COMMENTS

(Info Needed: On-Target, Off-Target, Completed or N/A(No Activity). If "Off Target", please explain why.

1ST QTR:
 Deliverable #1: No major permits were submitted for signature during the first quarter. ADEQ is currently working on Mesa, AZ0024031 (carryover); N. Phoenix Gateway AZ0024864 (new); and Green Valley-Pima County AZ0024902 (new). The Mesa permit has not progressed due to outstanding 208 and anti-degradation issues. Deliverable #2: ADEQ is working on a number of minor permits, and 4 were signed during the first quarter: Orchard Ranch AZ0023256, Jerome AZ0021804, Central & Camelback AZ0024848 and Big Park AZ0024082. Deliverable #4: This quarter ADEQ has also worked closely with EPA to develop a draft General Permit for the small MS4 facilities and to reissue individual permits to Phase I MS4s.

2ND QTR:
 Deliverable #1: No major permits were submitted for signature. ADEQ is currently working on the following major permits: Mesa AZ002431; N. Phoenix Gateway AZ0024864; Green-Valley Pima Co. AZ0024902; Avra Valley- Pima County AZ0024124; City of Tempe Kyrene AZ0023540; Asarco Ray Mine AZ0000035, and Gila Resources Safford AZ0024911. Mesa continues to have 208 and antidegradation issues. Gila Resources Safford submitted a variance request during the public notice period which will not be needed if federal nutrient standards are depromulgated (EPA anticipated by the end of 2002). Deliverable #2: 4 minor permits were signed in this quarter. Somerton AZ0023051; Queen Valley AZ0022071; Pine Canyon AZ0024902; Tusayan AZ0023477. AZPDES General Permit for Small MS4s was signed.

FY 2003 - 3rd Quarter EXCEPTION REPORT

GOAL #2: Reduce Trans-Boundary Risks. <i>Objective #11: Continue implementing the Border Strategy Plan.</i>			
		Program #9100: Border Issues	
TASK/ GRANT	OUTPUT DESCRIPTION	EVALUATION, DATE OR QUANTITY T=TARGET A=ACTUAL	RESPONSIBLE SECTION/ STAFF
2.11.1	TASK: U.S. / Mexico Transboundary Water Quality Projects. Follow up Transboundary Water Quality Issues in the Arizona - Sonora border area and conduct water quality studies border-wide. Provide general border coordination. DELIVERABLES:		
WQTAC	1. Support the Sonora Northeast WQ Monitoring project on WQ sampling activities under the ADEQ-UNISON MOU.	T = As needed	Hydrology
“ ”	2. Provide Hydrological support to the Nogales Wash PCE plume. Continue working with the appropriate US and Mexican agencies to monitor the groundwater in the Nogales Wash aquifer. Conduct one annual sampling event for binational wells located on both sides of the border. Continue efforts to delineate the PCE plume in the Sonoran Nogales Wash groundwater aquifer.	T = 3/03	Hydrology
“ ”	3. Provide general border water coordination under the new regional water group. Attend binational meetings. Participate in data collection/analysis efforts of groundwater environmental indicators for the Arizona-Sonora border region. Continue participating in the Arizona-Mexico Commission, attend the IBWC Citizen Advisory group meetings being planned for the Arizona-Sonora border, and support the Arizona tribes on their efforts for water quality assessments of transboundary basins. Continue to perform GPS/GIS activities to update well inventories and industrial facilities (and/or integrate existing data) in the border area.	T = As needed	Hydrology
GOAL #2: Reduce Trans-Boundary Risks. <i>Objective #11: Continue implementing the Border Strategy Plan.</i>
